Addendum 1
Invitation to Bid # 20-36-208577
Signal Crossing Batteries

This addendum is being issued to provide information as follows:

BIDDER QUESTIONS:

1. Are Mesa LSe 500 & LSe350 acceptable alternatives to the KCT 540 & 360?
a. No, these units are significantly taller than the specifications and will not fit in our application.

2. Are Hoppecke VM2-540 & VM2-360 acceptable alternatives to the KCT 540 & 360?
a. No, these units are significantly taller than the specifications and will not fit in our application.

3. C&D has two different types of KCT batteries P Poly Jar and S SANS Jar Prices are different on them. Which one are we using?
a. ARRC is using are requiring the Poly Jar configuration

4. We believe that the ARRC is requesting new hardware, to include all bolts, washers, nuts, flame arrestors, and sufficient inter cell connectors or cables to string 7 new cells into a single battery plant.
a. All hardware required to install a string, including straps, bolts, washers, flame arrestors, terminal adapters and inter cell connectors/cables are required. See attached image for reference

5. To predict and quote correctly APS needs to know the current design of the existing plants these batteries are intended to replace. This may or may not include new terminal hardware as well?
a. Please see attached reference images along with string layout count spreadsheet. All strings will require new hardware.
